

TECHNICAL DATA SHEET

Product: Anti-Terge[®] Moisture & Protective Cream

Product Description: Anti-Terge[®] cream helps maintain a delicate oil-moisture balance while providing the protection needed against the rigors of environmental work. Anti-Terge cream is uniquely formulated to provide a protective moisturizer to allow the skin to rehydrate. By reducing the evaporation of the skin's natural moisturizer, Anti-Terge allows the skin to retain more of its own moisture. This makes the skin become soft, smooth, and healthy again.

Indications for Use: Specially designed to moisturize and rehydrate skin.

Appearance: White creamy paste.

Curing Mechanism: Not applicable.

Shelf-Life: Not applicable.

Filler Type: Not applicable.

Main Composition (%w/w):

Deionized water	50 – 60
Emulsifiers	8 – 28
Emollients	4 – 24
Skin protectant	< 10
Humectant	< 10
Stabilizer	< 5
Thickener	< 5
Preservatives	< 1
Fragrance	< 1
Anti-oxidants	< 1
Opacifier	< 1

Physical /Mechanical Properties: (Typical Values)

pH	7.5
Specific Gravity	0.99
Viscosity, cP	400,000
Microbial Limits	Passes

Regulatory Classification:

This product is in conformity with the following standard(s) or other normative documents:

Code of Federal Regulations 21 CFR §701.3(a) – Cosmetic Labeling
